1 | Introduction

The SOLACE-CEE communication campaign was developed to raise awareness of the importance of integrated health and social care for people experiencing homelessness and to communicate the project's approach, activities and results to relevant audiences across Central and Eastern Europe.

The campaign combines EU-level communication materials developed around a shared SOLACE-CEE visual identity and key messages with locally adapted materials developed by project partners for national and local audiences. This two-tier approach ensures a consistent project identity while allowing partners to address the specific needs, contexts and communication environments of their respective countries.

OBJECTIVES

Increase visibility of the SOLACE-CEE project at the EU level as an innovative model for integrating health and social services.

Highlight European collaboration and emphasize how the project contributes to the EU's goal of ending homelessness by 2030.

Support replication of the project in other EU countries.

TARGET GROUP

EUROPEAN INSTITUTIONS AND POLICYMAKERS

including the European Commission, the European Social Fund (ESF), and representatives of EU Member States

SPECIALISED MEDIA

media outlets covering social policy, public health, and European projects

INTERNATIONAL ORGANISATIONS AND NETWORKS

those active in the field of homelessness, social inclusion, and health (e.g. FEANTSA).

PROFESSIONALS AND STAKEHOLDERS IN THE FIELD

social service providers, healthcare professionals, NGOs, and experts working on homelessness

RESEARCH AND ACADEMIC COMMUNITY

GENERAL PUBLIC

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Commission. Neither the European Union nor the granting authority can be held responsible for them.

LOCAL LEVEL

GOALS

SUPPORT LOCAL IMPLEMENTATION - increase understanding of the project among local stakeholders, institutions and communities.

ENGAGE LOCAL STAKEHOLDERS - strengthen cooperation between municipalities, healthcare providers, NGOs, Housing First teams, employment services and other actors.

RAISE AWARENESS - improve understanding of homelessness as a structural issue connected to health, housing and social systems.

SUPPORT ACCESSIBILITY OF SERVICES - provide clear and understandable information about available support systems and integrated services.

TARGET GROUP

PEOPLE FROM VULNERABLE GROUPS
people experiencing homelessness and other individuals in situations of housing exclusion

SERVICE PROVIDERS AND PROFESSIONALS
Social workers, healthcare professionals, NGOs, and other organisations providing services to people experiencing homelessness, as well as the clients themselves.

GENERAL PUBLIC

PUBLIC AUTHORITIES AND INSTITUTIONAL STAKEHOLDERS
local and regional authorities, municipalities, and relevant national-level stakeholders involved in policymaking and service coordination.

RESEARCH AND ACADEMIC COMMUNITY

2 | Visual identity

3.2 | NEWSLETTERS

Welcome to the SOLACE Newsletter!

We'd like to introduce you to project SOLACE CEE – an initiative focused on integrating health and social services to address the complex needs of the most vulnerable groups in our society.

Barrier-free health & support

This project unites the efforts of 7 organizations from 5 countries across Central and Southeastern Europe – **Slovakia, Hungary, Poland, Bulgaria** and **Romania**. Through innovative solutions and a community-driven approach, we are making a real difference where it's needed most.

In this newsletter, we bring you insights, stories about the project's beginnings, and updates on its implementation – directly from each partner. **Read on to discover more!**

Unique collaboration will bring unique social innovation to and homelessness

The EU has funded a unique collaboration across Central and Eastern Europe to integrate social and healthcare services for people experiencing homelessness. Led by the DEDO Foundation, the SOLACE CEE project launched in Košice and will pilot innovative support models in five countries over the next three years.

The goal? Not just managing homelessness – but ending it for good!

Welcome back to the SOLACE-CEE Newsletter #2

Over the past months, SOLACE CEE has moved from mapping systems to testing real collaboration between health and social services. Across CEE region – **Bulgaria, Hungary, Poland, Romania, Slovakia** – partners are starting to connect services, share expertise, and explore new ways to support people experiencing homelessness.

Transforming lives, ending homelessness.

Why INTEGRATED CARE matters?

The SOLACE-CEE Needs Assessment research results give a clear answer:

61 % of respondents report **at least one health condition**

80 % have experienced **at least one traumatic event**

25 % have been **denied access to healthcare**

40 % of people **have experienced disrespectful behavior from healthcare staff** at least once in their lives.

These challenges don't exist in isolation. Health, housing and social needs overlap — and require coordinated responses. This is exactly why SOLACE-CEE focuses on **INTEGRATED CARE**: connecting health, social support, and employment services into one coordinated response.

Explore the full findings

Explore what's new from our partners across CEE

In this section, we bring you insights, stories from local adaptation, and updates on how the project is being implemented — directly from our partners. **Read on to discover more!**

EUROPEAN LEVEL

Unique collaboration will bring unique social innovation to end homelessness

The first meeting of a Central and Eastern European consortium of organisations working with people with the experience of homelessness in their regions to jointly pilot integrated social and health services took place in Košice recently.

Casa Ioana - Romania, **Health and Social Development Foundation** - Bulgaria, **Hungarian Charity Service of the Order of Malta** (HCSOM) - Hungary, **Housing First Foundation** - Poland, **Metropolitan Research Institute Budapest** - Hungary, **DEDO Foundation** - Slovakia and **All for the Family** - Slovakia will thus pilot innovations in the field for the next three years.

This unique collaboration is supported by the European Commission, initiated and led by the **DEDO Foundation**, which will implement the **SOLACE CEE** project in two cities, Košice and Prešov. In total, the EC has supported 4 projects in the framework of the call for social innovation, in Slovakia a similarly large project and its support directly from Brussels has been received for the second time.

"Our goal is to create integrated social and health services in both cities, complementing the comprehensive approach to ending family homelessness - from housing to accompaniment and employment - that we are implementing in Eastern Slovakia," said Alena Vachnová.

"In our work, we try to use proven approaches that we bring and implement in Slovakia with the aim of ending homelessness, not just managing it," she added.

The Solace project seeks to pilot an innovative integrated health and social services initiative to address the complex needs of people with the experience of homelessness for this demographic. The project will embrace a holistic approach to homelessness, incorporating healthcare components within a continuum of care-from street outreach to housing solutions. This will be achieved by collaborating with dedicated and social specialist teams engaged in outreach fieldwork and medical clinics, supplemented by digital health and trauma-informed care elements. The resultant support services will integrate the humane values of the Housing First approach with a spectrum of health services (covering trust, physical, and mental health, including substance abuse), social care, employability services, social networking and support services. The overarching goal is to fully implement this innovative model in five countries within the Central and Eastern European (CEE) and Balkan region, specifically Slovakia, Hungary, Bulgaria, Poland, and Romania.

Homeless people in Central and Southeastern Europe face serious barriers to housing and healthcare – SOLACE-CEE research data reveals

Košice / Budapest / Warsaw / Sofia / Bucharest – 22 September 2025:

In spring 2025, a survey was conducted in five Central and Southeastern European countries as part of the SOLACE-CEE project, which aimed to map the real-life situation of people experiencing homelessness and housing exclusion. Through questionnaires and in-depth interviews, researchers examined living conditions, barriers to healthcare and social services, health literacy, and use of IT tools among people experiencing homelessness. The goal was to collect data to support the development of effective services for homeless people in the CEE region.

The research revealed that homeless people face a combination of challenges that often interact with each other. *"A total of 265 respondents (individuals and household heads) participated in the data collection, and the local teams conducted dozens of in-depth interviews not only with people experiencing housing exclusion but also with healthcare and social service providers in each country. This allowed us to gather not only quantitative data but also to understand the broader context, highlighting the complex needs of the target group,"* stated the research team at the Metropolitan Research Institute Budapest (MRI).

Key findings:

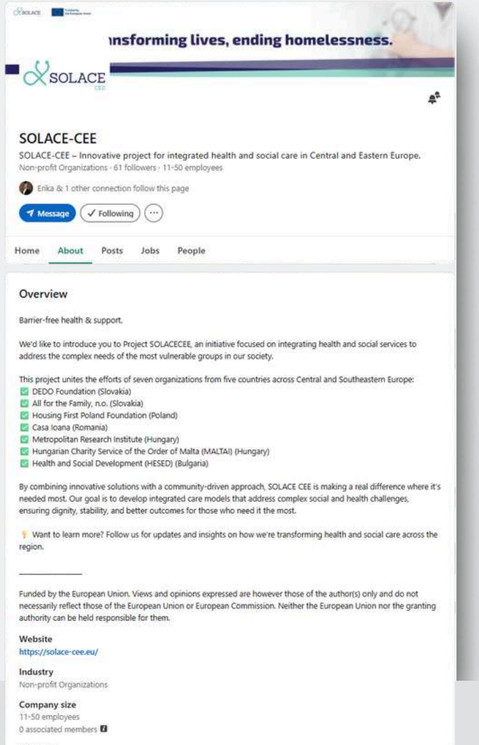

- The potential target group of the local hubs faces severe housing exclusion: 45% of respondents live in shelters, 23% in temporary structures, and only 15% in standard housing. One in ten households is completely without a roof over their heads. The sample included 279 minors (43%). Up to 70% of families with children are single-parent households.
- The groups that the local programs intend to include are very vulnerable in terms of income stability and are on the very margins on employability: 35% of women have only primary or no education at all (compared to 5% of men). Only 15% of respondents have formal employment, while 20% have no income. More than half (53%) rely on social benefits.
- Potential clients face multiple morbidities and their physical health data show significant challenges: 61% of respondents reported at least one health problem, 34% are unable to work due to their health, and 46% were hospitalized in the past two years. Preventive check-ups are almost non-existent, with 40% of respondents not attending medical examinations.

Information about SOLACE-CEE

SOLACE CEE

Projekt Solace sa zameriava na **holistický prístup k bezdomovectvu**, ktorý integruje zdravotné a sociálne služby reagujúce na komplexné potreby najzraniteľnejšej skupiny ľudí.

Tento prístup bude realizovaný prostredníctvom spolupráce s odbornými tímami, ktoré sú zamerané na prácu v teréne a poskytovanie zdravotnej starostlivosti. Do projektu budú zapojené aj digitálne zdravotné služby a traumu zohľadňujúca starostlivosť.

Poskytované služby budú integrovať humánne orientované hodnoty prístupu **Housing First** so **zdravotnými službami**, **sociálnou starostlivosťou**, **službami na zlepšenie zamestnateľnosti** a **sociálnou podporou**.

Hlavným cieľom je implementácia tohto inovatívneho modelu v piatich krajinách, a to konkrétne na Slovensku, v Maďarsku, Bulharsku, Poľsku a Rumunsku.

SOLACE CEE

Unikátna spolupráca prinesie unikátnu sociálnu inováciu pre ukončovanie bezdomovectva

Košice, Prešov 7. 11. 2024

V týchto dňoch sa v Košiciach konalo prvé stretnutie stredoeurópskeho konzorcia organizácií, ktoré vo svojich regiónoch pracujú s ľuďmi so skúsenosťou bezdomovectva, aby spoločne vytvorili a spustili integrované sociálno–zdravotné služby.

Bývanie ako prvé – Poľsko, **Casa Ioana** – Rumunsko, **Hesed** – Bulharsko, **Maltai** – Maďarsko, **Metropolitný inštitút Budapešť** – Maďarsko, **Nadácia DEDO** – Slovensko a **Všetci pre rodinu** – Slovensko tak budú najbližšie tri roky pilotovať inovácie v tejto oblasti.

Túto unikátnu spoluprácu podporila Európska komisia, iniciátorom a lídrom sociálnej inovácie je **Nadácia DEDO**, ktorá bude projekt **SOLACE CEE** realizovať v dvoch mestách, v Košiciach a v Prešove. Celkovo EK podporila v rámci výzvy na sociálne inovácie 4 projekty, na Slovensku sa podobne rozsiahly projekt a jeho podporu priamo z Bruselu podarilo získať druhýkrát.

„Naším cieľom je vytvoriť integrované sociálno-zdravotné služby v oboch mestách a doplniť tak komplexný prístup k ukončovaniu bezdomovectva radím - od bývania, cez sprevádzanie a zamestnávanie, ktorý na východnom Slovensku realizujeme," uviedla Alena Vachnová, ktorá je zároveň jednou z autoriek tohto ambicióznoho projektu.

„Pri našej práci sa snažíme využívať overené prístupy, ktoré s cieľom ukončovať bezdomovectvo, nie ho len manažovať, prinášame a implementujeme na Slovensku," doplnila.

Projekt Solace pilotne spustí inovatívne programy integrujúce sociálne a zdravotné služby, ktoré reagujú na komplexné potreby ľudí so skúsenosťou s bezdomovectvom. Projekt sa zameriava na holistický prístup k bezdomovectvu, ktorý spája rôzne služby, vrátane zdravotnej starostlivosti, v rámci celkového procesu podpory – od pomoci ľuďom na ulici až po poskytovanie bývania. Tento prístup bude realizovaný prostredníctvom spolupráce s odbornými tímami, ktoré sa zaoberajú prácou v teréne a poskytovaniu zdravotnej starostlivosti, pričom do procesu budú zapojené aj digitálne zdravotné služby a traumu zohľadňujúca starostlivosť (trauma informed care prístup), s cieľom zabezpečiť komplexnú podporu. Výsledná podpora bude teda integrovať humánne orientované hodnoty Housing First s rôznymi zdravotnými službami (súčasťou, ktorých je fyzické a duševné zdravie či podpora pri zvládaní závislosti), sociálnu starostlivosť, služby na zlepšenie zamestnateľnosti a sociálnu podporu. Hlavným cieľom je implementácia tohto inovatívneho modelu v piatich krajinách strednej a východnej Európy (CEE) a na Balkáne, konkrétne na Slovensku, v Maďarsku, Bulharsku, Poľsku a Rumunsku.

Financovaný Európskou úniou

Financované Európskou úniou. Vyjadrené názory sú však len názormi autorov a nemusia nevyhnutne odrážať pozíciadvky Európskej únie, alebo Európskej komisie. Európska únia, ani orgán poskytujúci pomoc za ne nezodpovedajú.

Ako napredujeme v integrácii zdravotnej a sociálnej starostlivosti?

V rámci projektu SOLACE-CEE sme sa stretli v Sofii spolu s partnermi.
Témou boli skúsenosti z terénu, nové prístupy, a mnohé rôznorode diskusie

Počas troch dní sme sa venovali tomu, ako prinášať integrovanú podporu zraniteľným skupinám ľudí – efektívne, dôstojne a komplexne.

Viac o tom, čo sme zažili, si prečítate v článku: https://nadaciadedo.sk/solace-cee-v-sofii-spolocne.../

Nadácia DEDO na FEANTSA Forum 2026

Minulý týždeň sme boli súčasťou jednej z najväčších európskych konferencií zameraných na boj proti bezdomovectvu. Nadáciu DEDO tam zastupovala Alena Vachnová, ktorá v sieti Nadácii DEDO vedie oblasť Stratégií a Inovácií.

V rámci panela Bridging Health and Social Services sme spolu s Health and Social Development Foundation (HESED) a Housing First Poland Foundation prezentovali projekt SOLACE-CEE a naše Centrá integrovanej starostlivosti zamerané pre zraniteľné skupiny ľudí.
Spoločne s partnermi z Poľska a Bulharska sme ukázali, čo znamená skutočne integrovaná starostlivosť.
Okrem prezentácie sme prostredníctvom case study viedli diskusiu o udržateľnosti služieb — financovaní a rozvoji tímu.

Sme radi, že môžeme zdieľať naše skúsenosti a byť súčasťou diskusií, ktoré nás posúvajú bližšie k spoločnej vízii— ukončovaniu bezdomovectva.

Information about SOLACE-CEE

SOLACE CEE

Zilele acestea a avut loc la Košice prima întâlnire a unui consorțiu din Europa Centrală și de Est format din organizații care lucrează cu persoane fără adăpost pentru a dezvolta în comun servicii sociale și de sănătate integrate.

În următorii 3 ani, Casa Ioana - România, Fundația pentru Sănătate și Dezvoltare Socială - Bulgaria, Serviciul de Caritate Maghiar al Ordinului Malta (HCSOM) - Ungaria, Fundația Housing First - Polonia, Institutul Metropolitan de Cercetare Budapesta - Ungaria, Fundația DEDO - Slovacia și All for the Family - Slovacia vor dezvolta servicii inovatoare în acest domeniu.

Această colaborare unică este susținută de Comisia Europeană și este inițiată și condusă de Fundația DEDO, care va implementa proiectul SOLACE CEE în două orașe, Košice și Prešov. În total, Comisia Europeană sprijină 4 proiecte în cadrul apelului pentru inovare socială, în Slovacia un proiect asemănător a primit pentru sprijin pentru a doua oară din partea Comisiei.

„Scopul nostru este de a crea servicii sociale și de sănătate integrate în ambele orașe, venind în completarea abordării complexe de a pune capăt fenomenului persoanelor fără adăpost din rândul familiilor – de la locuință, la suport și găsirea unui loc de muncă – pe care o implementăm în Slovacia de Est", a afirmat Alena Vachnová. „În munca noastră, încercăm să folosim metode testate pe care le aducem și le implementăm în Slovacia, cu scopul de a pune capăt fenomenului persoanelor fără adăpost, nu doar de a gestiona fenomenul."

Funded by the European Union. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union or European Commission. Neither the European Union nor the granting authority can be held responsible for them.

PENTRU PUBLICARE IMEDIATĂ

Parteneriat Strategic pentru Sănătate: Asociația Casa Ioana și Crucea Roșie Sector 4 își unesc forțele în cadrul proiectului SOLACE-CEE

BUCUREȘTI – Asociația Casa Ioana anunță lansarea unui parteneriat strategic cu Societatea Națională de Cruce Roșie din România – Filiala Sector 4 București. Această colaborare marchează o etapă decisivă în implementarea proiectului **SOLACE-CEE**, vizând eliminarea barierelor critice în accesarea serviciilor medicale pentru persoanele aflate în situații de vulnerabilitate extremă.

În cadrul ecosistemului SOLACE-CEE, acest parteneriat nu reprezintă doar o aliniere administrativă, ci un pilon esențial de intervenție. Accesul la servicii medicale de bază și de specialitate este fundamental legat de reintegrarea socială și de restaurarea demnității umane. Prin asigurarea unui suport medical specializat, proiectul garantează că procesul de stabilitate al beneficiarilor este clădit pe o fundație solidă de sănătate fizică și mentală.

Pilonii Medicali Centrali ai Colaborării:

- 🔴 **Evaluare și triaj medical:** facilitarea accesului la consultații de specialitate și evaluări rapide ale stării de sănătate.
- 🔴 **Evaluarea stării de sănătate:** monitorizarea sistematică a bunăstării fizice a beneficiarilor pentru identificarea nevoilor medicale imediate și pe termen lung.
- 🔴 **Activități de redirecționare medicală:** coordonarea și direcționarea pacienților către furnizori de servicii medicale specializate și clinici pentru tratamente țintite.
- 🔴 **Accesibilitate crescută:** simplificarea procedurilor de navigare în sistemul public de sănătate pentru persoanele care nu dețin asigurări medicale sau documente de identitate complete.

„Sănătatea nu ar trebui să fie un privilegiu, ci un drept fundamental restaurat pentru fiecare persoană care luptă să își reconstruiască viața. Prin acest parteneriat cu Crucea Roșie Sector 4, ne asigurăm că beneficiarii proiectului SOLACE-CEE primesc nu doar adăpost și consiliere, ci și îngrijirea medicală vitală de care au nevoie pentru a parcurge drumul către independență cu demnitate și încredere." – **Ian Tilling, Președintele Asociației Casa Ioana.**

*„**Prevenția reprezintă un pilon esențial într-un sistem de sănătate eficient iar Crucea Roșie Română rămâne dedicată prevenirii și alinării suferinței umane. Prin parteneriatul cu Casa Ioana oferim sprijin beneficiarilor care au cea mai mare nevoie de susținerea sănătății fizice și psihice.**" – Valentin Mărișoiu, Director, Crucea Roșie Română – Filiala Sector 4*

Integrarea expertizei Crucii Roșii Sector 4 aduce o valoare adăugată inestimabilă proiectului. În timp ce echipele de asistenți sociali și psihologi lucrează la stabilitatea locativă și emoțională, această colaborare asigură că sănătatea fizică — fundamentul unei vieți independente — este protejată.

Asociația Casa Ioana transmite mulțumiri echipei Crucii Roșii Sector 4 pentru deschidere și pentru angajamentul de a fi parteneri în acest demers umanitar de amploare.

Despre Proiectul SOLACE-CEE: SOLACE-CEE este unul dintre cele patru proiecte finanțate în apelul **ESF-2023-HOMELESS** (Social Innovation Practices to Combat Homelessness), at de Comisia Europeană. Proiectul a început în octombrie 2024 și se va desfășura până în embrie 2027, având ca scop implementarea unor soluții inovatoare și integrate pentru baterea fenomenului lipsei de adăpost.

Parteneriat Strategic Umanitar

Asociația Casa Ioana & Crucea Roșie Română Filiala Sector 4
Lansare oficială în cadrul proiectului SOLACE-CEE

BUCUREȘTI — Asociația Casa Ioana anunță lansarea unui parteneriat strategic cu Crucea Roșie Română Filiala Sector 4.

Această colaborare marchează o etapa decisivă în implementarea proiectului SOLACE-CEE, vizând eliminarea barierelor critice în accesarea serviciilor medicale pentru persoanele aflate în situații de vulnerabilitate extremă.

În cadrul ecosistemului SOLACE-CEE, acest parteneriat nu reprezintă doar o aliniere administrativă, ci un pilon esențial de intervenție. Accesul la servicii medicale de bază și de specialitate este fundamental legat de reintegrarea socială și de restaurarea demnității umane.

PILONII MEDICALI CENTRALI AI COLABORĂRII

🔴 **Evaluare și triaj medical**
Facilitarea accesului la consultații de specialitate și evaluări rapide ale stării de sănătate.

🔴 **Evaluarea stării de sănătate**
Monitorizarea sistematică a bunăstării fizice pentru identificarea nevoilor imediate și pe termen lung.

🔴 **Activități de redirecționare medicală**
Coordonarea și direcționarea pacienților către furnizori de servicii medicale specializate și clinici.

🔴 **Accesibilitate crescută**
Simplificarea procedurilor în sistemul public de sănătate pentru persoanele fără asigurări sau acte complete.

📅 **ACCES SERVICII & PROGRAMĂRI**

Pentru a beneficia de serviciile medicale, este necesară o discuție în prealabil cu **Asociația Casa Ioana**. Ne puteți contacta telefonic la numărul **0213326390** sau ne puteți scrie pe adresa de e-mail **cristina.enache@casaioana.org**.

Integrarea expertizei Crucii Roșii Sector 4 aduce o valoare adăugată inestimabilă. În timp ce echipele de asistenți sociali lucrează la stabilitatea locativă și emoțională, această colaborare asigură protecția structurală a sănătății fizice.

— Ian Tilling, Președintele Asociației Casa Ioana

„Prevenția reprezintă un pilon esențial într-un sistem de sănătate eficient, iar Crucea Roșie Română rămâne dedicată prevenirii și alinării suferinței umane. Prin parteneriatul cu Casa Ioana oferim sprijin beneficiarilor care au cea mai mare nevoie de susținerea sănătății fizice și psihice."

— Valentin Mărișoiu, Director, Crucea Roșie Sector 4

DESPRE PROIECT ȘI PARTENERI

Proiectul SOLACE-CEE

Este unul dintre cele patru proiecte finanțate la nivel european prin apelul Comisiei Europene ESF-2023-HOMELESS (Social Innovation Practices to Combat Homelessness). Desfășurat în perioada **octombrie 2024 – septembrie 2027**, are ca scop implementarea unor soluții inovatoare și complet integrate pentru combaterea fenomenului lipsei de adăpost în Europa Centrală și de Est.

Asociația Casa Ioana

Fondată în 1995, este principalul furnizor de servicii din București pentru familiile și femeile singure care se confruntă cu lipsa unui adăpost, asigurând o abordare integrată prin cazare temporară sigură, suport psihosocial complet, programe personalizate de inserție profesională și mentorat pentru dobândirea deplinei independențe.

Crucea Roșie Sector 4

Filială dedicată furnizării de soluții de asistență umanitară de urgență și servicii de suport comunitar. Prin rețeaua sa și Programele de Promovare a Sănătății, oferă asistență medicală de bază, cursuri specializate de prim ajutor și intervenție directă pentru grupuri defavorizate.

SOLACE-CEE 2024-2027

Solutions for Overcoming Homelessness through Integrated Care in the CEE region

STRONA PARTNERSTWA SOLACE CEE

Celem partnerstwa SOLACE CEE jest dopracowanie programów zapewniających innowacyjne, zintegrowane usługi zdrowotne i społeczne odpowiadające na złożone potrzeby i cele osób z doświadczeniem długotrwałej bezdomności. Usługi będą dostarczane przez partnerów holistycznie bez względu na sytuację mieszkaniową uczestników i uczestniczek - tak samo w sytuacji, bytowania w przestrzeni publicznej, w placówkach jak i w mieszkaniach. Powstaną programy zintegrowanych, kinki medyczne, mobilne projekty wsparcia środowiskowego dla osób w mieszkaniach, usługi telemedyczne i medycyny cyfrowej, wzajemnych kwartałach na Słowacji, Węgrzech, Bułgarii, Polsce i Rumunii. Wszystkie działania będą oparte na podstawach naukowych, wrażliwe na traumę (trauma informed care) i konsekwentnie poprzez humanistyczne wartości. Najpierw mieszkanie podejmie wspierających wielu interesariuszy i partnerzyjnych, traktowanie mieszkania jako prawa, prawa do samostanowienia, samorządu dla każdego kroku w stronę pełnego dobrostanu oraz zapewnienie wsparcia odtwarzającego dostępności dachu nad głową.

SOLACE CEE

Osoby w kryzysie bezdomności w regionie Europy Środkowej napotykają na poważne bariery w dostępie do usług zdrowotnych i socjalnych – wynika z badań SOLACE-CEE

Koszyce / Budapeszt / Warszawa / Sofia / Bukareszt – 22 września 2025 r.:

Wiosną 2025 roku w ramach projektu SOLACE-CEE przeprowadzono badanie w pięciu krajach Europy Środkowej i Południowo-Wschodniej, którego celem było poznanie sytuacji osób doświadczających bezdomności związanej z dostępem do usług zdrowotnych, socjalnych i mieszkaniowych. W badaniu określono warunki życiowe, bariery w dostępie do usług, kompetencje zdrowotne oraz sposoby korzystania z telemedycyny. Celem było zebranie informacji wspierających rozwój skutecznych usług w regionie.

Według zespołu badawczego Metropolitain Research Institute z Budapesztu odpowiadającego za badanie, badania wykazały, że osoby doświadczające bezdomności borykają się z wieloma współwystępującymi trudnościami, które wzajemnie na siebie wpływając pogarszają sytuację osób". W badaniu ilościowym wzięto udział łącznie 265 osób (indywidualnych lub „głów" gospodarstw domowych), w badaniach jakościowych z osobami doświadczającymi wykluczenia jak i specjalistami swoim doświadczeniem podzielito się kilkadziesiąt osób z instytucji wspierających, co pozwolito odtworzyć zarówno skalę jak i szerszy kontekst problemu.

Badana grupa to osoby doświadczające poważnego wykluczenia mieszkaniowego: tylko 15% mieszka w standardowych mieszkaniach (głównie w Polsce), aż 45% w schroniskach, 23% w miejscach niemieszkalnych. Co dziesiąte badane gospodarstwo domowe było całkowicie pozbawione „dachu nad głową" – to osoby żyjące dosłownie „na ulicy". W gospodarstwach domowych respondentów wychowywało się aż 279 osób niepełnoletnich, w większości w rodzinach niepełnych.

Kluczowe ustalenia:

- Zbadana grupa to ludzie o niestabilnych dochodach jednocześnie znajdujący się na granicy możliwości zatrudnienia: 35% kobiet ma wykształcenie podstawowe lub żadne (w porównaniu z 5% mężczyzn). Aż 85% respondentów nie jest formalnie zatrudnionych, 20% nie ma żadnych dochodów, a jedynie połowa (53%) korzysta ze świadczeń socjalnych.
- Respondenci zmagają się z wieloma schorzeniami zdrowia fizycznego: 61% mierzy się z co najmniej jednym problemem zdrowotnym, 34% uważa, że ich stan zdrowia uniemożliwia pracę. 46% osób było hospitalizowanych w ciągu ostatnich dwóch lat. Jednocześnie badanie pokazało, że respondenci praktycznie nie korzystają z badań profilaktycznych, a 40% z żadnych badań.

FMNP Bridging health

VALUE BASED APROACH

RECOVERY

Recovery as the right to full physical, mental and social wellbeing with appreciation for each step towards better health and the fact that full health, such as abstinence from substances, is a goal rather than a means.

SUPPORT

Support as access to individualised, multidisciplinary and continuous support relevant to health diagnosis and goals eg. personal assistae, trauma informed care, psychiatric and mental health services, general health services.

DECISIONS

Decisions as the right to take one's own decisions concerning one's life and goals, without them being suggested or enforced by support workers, without anticipation of their appearance, making sure that they develop one's agency.

RELATIONSHIP

Relationship as a safe space for support worker and the customer to express themselves and receive each others reactions; it is to model good behaviours.

HOUSING

Housing as a right meaning access to an apartment which is independent, private and long term without any preliminary conditions concerning health, treatment, employment or 'readiness'.

COMMUNITY

Community as the right to be addressed/treated as a member of the local community regardless of the kind of housing situation and the right to housing in a 'social mix' with full access to services available for all members of the community rather than in a special programme, isolated space or institution (deinstitutionalisation).

the project is co-funded by the EU (90%) and that NMP's own contribution is covered by NIW PRO.

SOLACE-CEE Project

SOLACE

Chronically homeless people have very complex and persistent needs that, if not addressed appropriately, lead to poor health, prolonged homelessness and even death. They face health inequalities and multiple financial and non-financial barriers to accessing care and require very specific and tailored services to be delivered to them over the long term.

Based on growing international evidence and experience, we have identified four key components for improving the well-being of people experiencing homelessness that can help end homelessness:

1. A holistic continuum care
2. Targeted health services
3. Effective outreach
4. Trauma-informed care

The SOLACE-CEE project aims to pilot an innovative initiative for integrated health and social services to address the complex needs of chronically homeless people. The main objective is to identify effective ways to end homelessness among this demographic group.

The project will implement a holistic approach to homelessness, incorporating health components as part of a continuum of care – from outreach to housing solutions. This will be achieved through collaboration with specialist health and social care teams engaged in outreach and medical clinics, complemented by a trauma-informed approach and digital healthcare. The resulting support services will integrate the humane and person-centred values of the Housing First approach with a range of health services (covering trust, physical and mental health, including addiction support), social care, employment services and social networks and support services. The main objective is to fully implement this innovative model in five countries within the Central and Eastern Europe (CEE) and Balkan region, specifically Slovakia, Hungary, Bulgaria, Poland and Romania.

Project Objectives:

- Extend outreach services beyond typical locations, reaching communities not traditionally monitored and addressing

engagement challenges by fostering trust, cultural competence, and empathy in service providers.

- To increase the organizational capacity of outreach services and integrated support programs by providing additional training and resources to staff, focusing on healthcare professionals and the trauma-informed care approach.
- To provide missing data on homelessness in project countries (e.g. national data for Slovakia or data on aspects of homelessness in other countries).
- Establish an integrated and comprehensive support program that delivers consolidated housing, social health services and general assistance to chronically homeless people regardless of their dwelling place, providing them with a holistic and coordinated approach to address all their diverse needs.

Term: 1 October 2024 – 30 September 2027

Бездомните хора в Централна и Югоизточна Европа са изправени пред сериозни бариери по отношение на жилищното настаняване и здравеопазването – разкриват данни от проучване на SOLACE-CEE

Кошице / Будапеща / Варшава / София / Букурещ – 22 септември 2025 г.:

През пролетта на 2025 г. в пет страни от Централна и Югоизточна Европа беше проведено проучване като част от проекта SOLACE-CEE, чиято цел беше да картографира реалната ситуация на хората, изпитващи бездомност и изключване от жилищно настаняване. Чрез въпросници и дълбочинни интервюта бяха изследвани условията на живот, бариерите пред здравеопазването и социалните услуги, здравната грамотност и използването на ИТ инструменти сред хората, изпитващи бездомност. Целта беше да се съберат данни в подкрепа на разработването на ефективни услуги за бездомните хора в региона на Централна и Източна Европа.

Изследването разкри, че бездомните хора са изправени пред комбинация от предизвикателства, които често си взаимодействат. „Общо 265 респонденти (физически лица и глави на домакинства) участваха в събирането на данни, а местните екипи проведоха десетки дълбочинни интервюта не само с хора, изпитващи жилищна изолация, но и с доставчици на здравни и социални услуги във всяка от петте държави. Това ни позволи да съберем не само количествени данни, но и да разберем по-широкия контекст, подчертавайки сложните нужди на целевата група", каза Нора Телър, старши експерт-изследовател в Metropolitan Research Institute (MRI) - Будапеща.

Ключови констатации:

● Потенциалната целева група на местните центрове е изправена пред тежка жилищна изолация: 45% от респондентите живеят в приюти, 23% във временни структури и само 15% в стандартни жилища. Едно на десет домакинства е напълно без покрив над главата си. Извадката включва 279 непълнолетни (43%). До 70% от семействата с деца са домакинства с един родител.

● Групите, към които са насочени местните програми, са много уязвими по отношение на стабилността на доходите и са буквално на ръба по отношение на пригодността за заетост: 35% от жените имат само начално или никакво образование (в сравнение с 5% от мъжете). Само 15% от анкетираните имат официална заетост, докато 20% нямат доходи. Повече от половината (53%) разчитат на социални помощи.

● Потенциалните клиенти са изправени пред множество заболявания и данните за физическото им здраве показват значителни предизвикателства: 61% от анкетираните съобщават за поне един здравословен проблем, 34% не могат да работят поради

SOLACE-CEE

2025. július 8.

Június 23. és 25. között Szófiában jártunk a SOLACE-CEE program keretében. Bolgár partnerünk, a HESED Alapítvány vezetésével, Európa egyik legnagyobb illegális roma telepét (Fakulteta) és hajléktalanellátó intézményeket tekintettünk meg és megvitattuk, hogy hogyan fejleszthető az ott élők egészségügyi ellátásba való bevonása és egészségtudatossága. A háromnapos látogatást egy Innovation Team meetinggel kapcsoltuk össze, amely lehetőséget adott arra, hogy betekintsünk a HESED integrált egészségügyi gyakorlatába. A találkozón összesen 25 szakember vett részt, és minden partnerszervezet képviseltette magát. Kutatóintézetünk munkatársai a találkozó első napján ismertették a bemeneti kvantitatív és kvalitatív igényfelmérés előzetes eredményeit. A második napon került sor a HESED intézményeinek meglátogatására, majd az utolsó napon megtartottuk a Communication Team meetinget is, ahol beszámoltunk a projekt közösségi média platformjain történő népszerűsítésének előrehaladásáról.

Első hírlevél – 2025. február 14.

Mit érdemes tudni az egészségismeretről? – 2025. január 6.

SAJTÓKÖZLEMÉNY – 2024. november 6.

Hat civil szervezet, köztük szlovák, bolgár, lengyel, román és magyar ellátók együttműködésében október 1-jén indult el a hajléktalan emberek számára nyújtott szociális és egészségügyi szolgáltatások összekapcsolását szolgáló innovációk fejlesztése és kipróbálása a kassai DEDO Alapítvány vezetésével. A Városkutatás Kft. feladata a projekt monitoringja és hatásértékelése.

A résztvevő szervezetek:

- DEDO Alapítvány és Všetci pre rodinu, n.o. (All for Family) – Kassa (Košice) és Eperjes (Prešov)
- Magyar Máltai Szeretetszolgálat Egyesület – Budapest
- HESED – Szófia
- Casa Ioana – Bukarest
- Najpierw mieszkanie – Varsó

VARSÓBAN JÁRTUNK A SOLACE-CEE PROGRAM KERETÉBEN MÁJUSBAN

2026. JÚLIUS 9.

Városban jártunk a SOLACE-CEE program keretében, ahol a partnerség elérte a projekt hivatalos félidejét. A háromnapos szakmai találkozót egy kibővített menedzsment (SC és PM) üléssel, valamint a 15. Innovation Team meetinggel kötöttük össze. Kutatóintézetünk munkatársai a találkozót megelőző hetekben egy online kérdőív segítségével gyűjtötték össze a partnerek visszajelzéseit, a városi ülésen pedig mi mutattuk be és fogaltuk össze ennek a belső monitoring folyamatnak az eredményeit. A találkozó egy fontos személyi változást is hozott: Somogyi Eszter lekészönt az Innovation Team vezetéséről, feladatait pedig ettől a mérföldkőtől kezdve Alena Vachnová vette át. Külön öröm és siker a projekt életében, hogy a konzorciumi ülést megelőző napokban, szintén Varsóban megrendezett neves nemzetközi FEANTSA FORUM 2026 konferencián a SOLACE-CEE projekt is bemutatásra került a partnerszervezetek egy-egy előadásán keresztül. Így a szélesebb nemzetközi szakmai közönség is megismerhette az eddigi eredményeinket. A hazai monitoring felmérésünk eredményei alapján a partnerszervezetek kapacitása és szakmai tapasztalata jelentősen megerősödött az elmúlt egy évben. Bár a helyi mintaprojektek – mint a menedékhelyeken bevezetett telemedicina vagy az integrált regionális HUB-ok – sikeresen elindultak, a megvalósítás során a partnerek komoly rendszerszintű akadályokkal szembesültek. Ilyen a tartós humánerőforrás-hiány és a magas fluktuáció, a merev finanszírozási keretek, valamint a célcsoport körében tapasztalható rendkívül intenzív támogatási igény és a rejtett mentális egészségügyi problémák. A találkozó zárásaként megvitattuk a jövőbeli lépéseket, ahol az adminisztratív feladatok helyett a gyakorlat-orientált, egymástól való tanulásra (peer-to-peer) és a stabil lakhatási politikákkal való összekapcsolásra fogjuk helyezni a hangsúlyt.

SOLACE-CEE PROJECT LAUNCHED

2024-11-06

On October 1, six civil organizations, including providers from Slovakia, Bulgaria, Poland, Romania, and Hungary, launched the development and testing of innovations aimed at integrating social and healthcare services for homeless people. The project is led by the DEDO Foundation in Košice, with MRI responsible for monitoring and impact assessment. Read more at https://mri.hu/en/solace-cee/

WE VISITED WARSAW AS PART OF THE SOLACE-CEE PROJECT IN MAY

2026-07-09

We visited Warsaw as part of the SOLACE-CEE project, marking the official halftime of the program. The three-day meeting was combined with an extended management (SC and PM) session and the 15th Innovation Team meeting. In the weeks leading up to the event, our institute designed and distributed an online questionnaire to gather feedback from the partners, and during the Warsaw meeting, we presented the synthesized results of this internal monitoring exercise. The meeting also marked an important leadership transition: Eszter Somogyi stepped down as the leader of the Innovation Team, and Alena Vachnová took over the role starting from this milestone. It was also a major highlight and success for the project that in the days preceding our consortium meeting, the SOLACE-CEE project was showcased through partner presentations at the prestigious FEANTSA FORUM 2026 conference, which was also hosted in Warsaw. This provided an excellent opportunity to introduce our work to a wider international professional audience. Based on the monitoring feedback compiled by our team, the participating organizations have significantly strengthened their capacity and expertise over the past year. Although local pilot activities—ranging from telemedicine in shelters to establishing integrated regional HUBs—have been successfully launched, partners faced major systemic barriers during implementation. These include persistent staff shortages and high turnover, rigid funding frameworks, as well as the intense level of client needs and a hidden mental health burden among the target group. Concluding the meeting, we discussed future steps, agreeing that
